

New CO-OP Positions with Catalent and Bristol Myers Squibb,

Description

The [UC San Diego Division of Biological Sciences Co-Op Program](#) is a new program that offers participating students a one-year paid work experience at participating life sciences companies, such as the companies listed below. Students work full-time during summer and part-time during the academic year. While working at the company, students take a remote professional development course where students evaluate, discuss, and present on the skills they are developing and progress they are making in their work experience. The program is open to all undergraduate students. Students
